**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

ptopatentcommunication@lockelord.com

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 4/13/2009 have been fully considered but they are not persuasive.

The applicant argues that Labun and Phillipson do not teach the limitations of claims 56, 62, and 68 further stating that the "applicant's claimed invention enables the wireless short-range communication module to immediately detect paging signals addressed to the wireless short-range communication module **without waiting for the wireless short-range communication module to first go through a preliminary sequence of receiving an inquiry packet from the sending terminal** and responding with an inquiry response packet containing the address of the wireless short-range communication module". This step of skipping the inquiry stage is present in the allowed independent claims, but missing from claims 56, 62, and 68. Since the step of skipping the inquiry stage is not present in claims 56, 62, and 68, the examiner believes that those claims are still broad enough to be read on by the combination of Labun and Phillipson. The combination of Labun and Phillipson is operable to read on the claims as currently written but may be inoperable if more specifics regarding the skipping of the inquiry stage was added to the claims.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to EUGENE YUN whose telephone number is (571)272-7860. The examiner can normally be reached on 9:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duc Nguyen can be reached on (571)272-7503. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
